- Active Listening

WORK HISTORY

PAINTER LABORER

11/2022 to CURRENT

Van Der Werwe Inc | 8256 Dunham Station Dr Tampa FL 33647

- Covered surfaces and furnishings with cloth and plastic to protect from paint drops.
- Used brushes, spray guns and paint rollers to paint surfaces.
- Used putty knives and caulking guns to fill cracks, holes and joints with plaster, putty and caulk.
- Applied primers or sealers to prepare new surfaces such as bare wood or metal, for finish coats.
- Used sandpaper to scrape walls and other surfaces to remove old paint.
- Used sandpaper, scrapers, grinders and steel wool to smooth surfaces.
- Removed fixtures such as pictures, doorknobs, lamps and electric switch covers prior to painting.
- Selected premixed paints or mixed required portions of pigment, oil and thinning and drying substances to prepare paint to match specified colors.
- Read blueprints and instructions and examined surfaces to determine kind and amount of work necessary for each project.
- Calculated amounts of required materials and approximate time to complete each project to estimate project costs.
- Managed daily operations by scheduling and coordinating appointments, assisting customers in selecting and matching colors and preparing invoices and bank deposits.
- Met with **Number** clients per **Timeframe** to discuss color and finish options

and other design details.

- Corrected surface imperfections by filling cracks, holes and joints.
- Primed and sealed surfaces to best support paint coats.
- Applied caulk, putty and plaster to walls using correct techniques to achieve professional finishes.
- Performed regular preventive maintenance on tools and equipment to support best quality of work.
- Achieved optimal adherence by washing, treating and sanding surfaces.
- Conducted final work check to assess quality and make corrections if necessary.
- Applied paint with cloth, brush, sponge and fingers to create special effects.
- Trained new staff on initial setup routines and continual work monitoring procedures.
- Interacted with clients to report progress and verify timetable for completed work.
- Calculated accurate amounts of materials and estimated time for planned jobs.

ELECTRICAN INTALATION

01/2006 to 03/2019

Empresa Eléctrica | Cuba

- Worked from ladders, scaffolds and lifts to install, maintain or repair electrical wiring equipment and lighting fixtures in ceilings, on roofs and on towers.
- Worked with various types of cableways, conduits and other electrical raceways.
- Used testing instruments such as ohmmeters, voltmeters, ammeters and multimeters.
- Installed and wired electrical transformers, service panels, and circuit breakers.
- Read and interpreted electrical, mechanical and architectural drawings and electrical code specifications for wiring layouts.
- Inspected electrical systems, equipment and components to identify hazards, defects and repair requirements.
- Planned layout and installation of electrical wiring, equipment and fixtures based on specifications and applicable code.
- Stored and maintained power tools and equipment for each job.
- Installed, maintained, repaired and tested equipment for electricity generation and utilization.
- Demonstrated expertise in use of cable reels, stripping tools, voltage detectors and wire and cable cutters to complete fast-paced work.
- Launched troubleshooting and tests on equipment post-installation to confirm compatibility and safety of electrical systems.
- Coordinated with other trades and general contractors to facilitate layout of recessed fixtures and architectural lighting.

- Analyzed blueprints to diagnose potential electrical hazards and carry out risk assessments prior to starting new jobs.
- Identified areas of potential state safety code violations and implemented revisions.
- Enhanced quality control by inspecting condition of equipment and tools.
- Conducted site visits to plan placement of equipment and interconnection to site's existing electrical system.
- Owned and addressed client needs and product issues from inception to resolution.
- Tested equipment tools such as oscilloscopes, ammeters and test lamps.
- Provided high-level technical support by resolving inquiries by phone, e-mail and web consistent with department and team service levels and goals.
- Maintained detailed documentation through logging of support cases, e-mail and knowledge base articles for client and internal use.
- Used Arc and TIG methods to weld flat, cylindrical and irregular electrical connector-related parts.
